About Indian Institute of Welding

The Indian Institute of Welding (IIW) is a non-profit professional body recognized by The International Institute of Welding, to promote the interests of welding industry and practising welding professionals in India since 1966. IIW has its headquarters at Kolkata and has eleven branches located at key industrial cities. The Mumbai Branch of IIW, with its large individual and corporate membership, is one of the institute's most active branches. IIW, Mumbai Branch has been promoting the interests of professionals and industries associated with welding in Western India. The branch conducts regular technical lectures, refresher courses, training programs, workshops and seminars on a regular basis for its members, engineers and welding practitioners. The Associate Membership examination (AM-IIW) conducted by the institute has been recognized by the HRD Ministry, Govt. of India; as equivalent to an engineering degree.

Theme

Despite being indispensable to society, degree of recognition given to Indian Welding Industry on national industrial scene is inadequate. During last four decades a large number of industrial units have been set up for welded fabrication. Some of them have brought about necessary technological changes. Welding scenario in India is different from that of industrialized countries. Semi-automatic processes and need for trained manpower are constraints in bringing about changes. The seminar aims to deliberate on these aspects, subsequently inculcate awareness with respect to welding, identify path to improve productivity and efficiency in welding.
